

5-10% OF ALL BREAST CANCER IS HEREDITARY

Understand Your Risk of Developing Cancer, So You Can Take Action

Gene mutations and a family history of disease can increase your risk for developing certain types of cancer. In honor of Breast Cancer Awareness Month, and in order to make genetic counseling more accessible, we are offering a **promotional rate of \$115 per session** to our self-pay patients through the month of October, 2021. Genome Medical is also in-network with many large insurance providers and a genetic counseling appointment may be a covered benefit under your plan.

How Does it Work?

We Offer Multiple Billing Options

Insurance

With in-network insurance coverage, on average our patients pay \$50 per visit. Genome Medical is now in-network with multiple large insurance providers however, genetic counseling may not be covered in all cases.

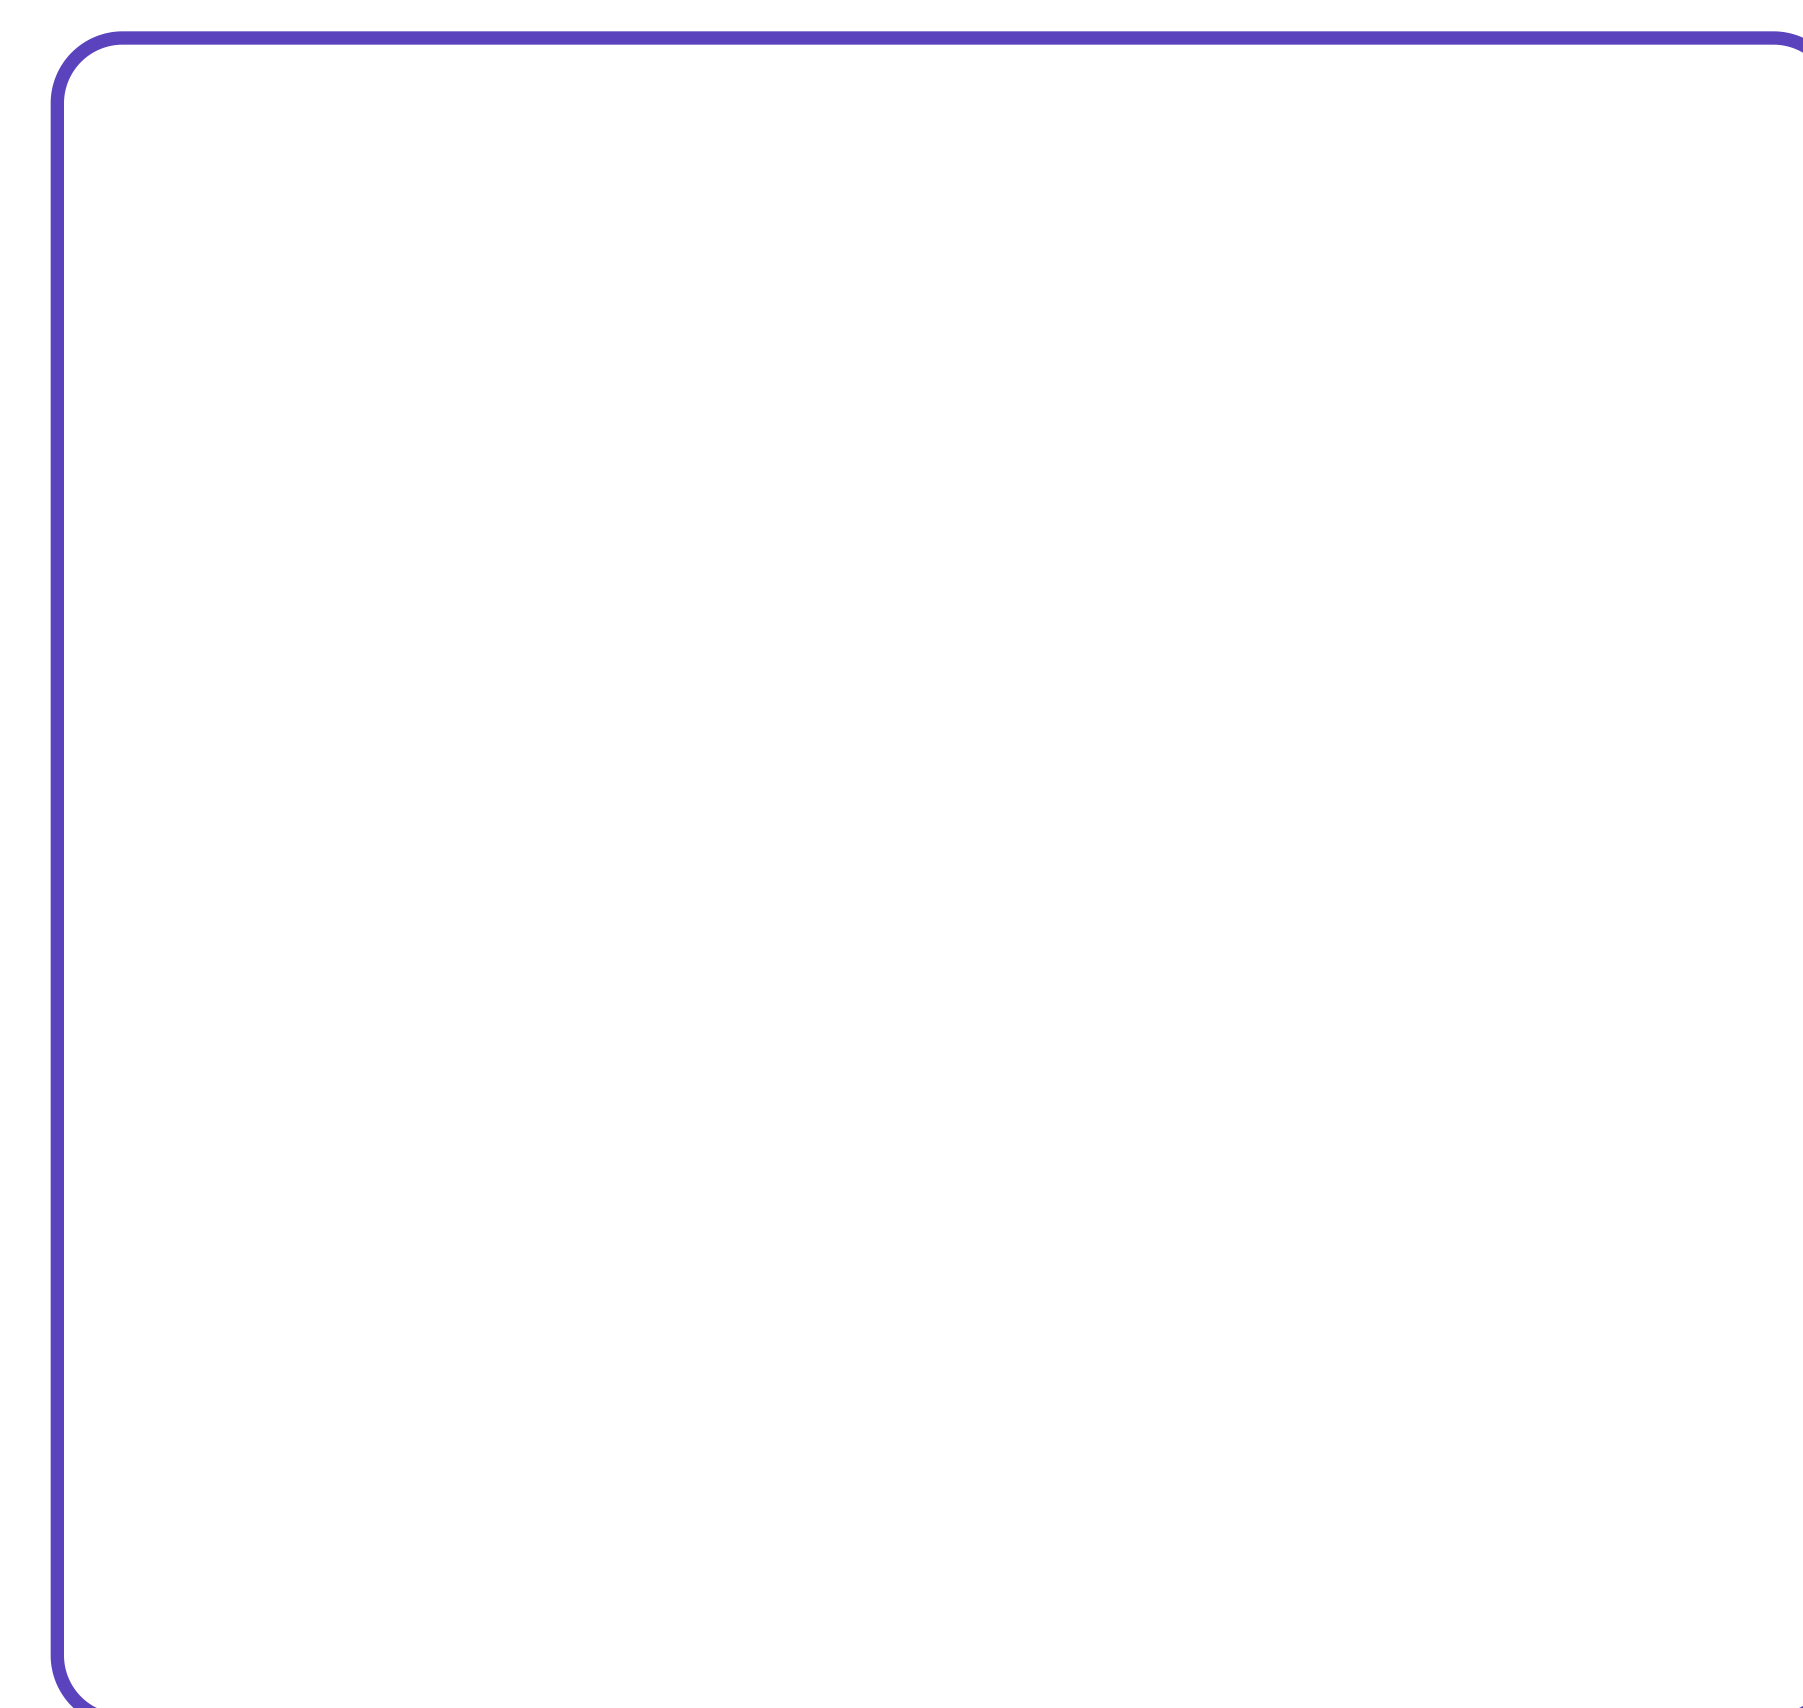

Self-Pay

We offer an affordable self-pay option for our patients who prefer to pay out-of-pocket. For the month of October, pay just

~~\$179~~ **\$115**

for a genetic counseling appointment

This cost does not include genetic testing. Any genetic testing will need to be paid for separately.
